

MAYANK CHAUDHARY

Full-Stack & AI Developer | React · Next.js · Node.js

7830650675 | mayankchaudharyetw123@gmail.com | Lucknow, UP, India | [Portfolio](#) | [GitHub](#)

EXPERIENCE

Full Stack Developer | mastertej.com

Jul 2026 – Present

- Develop and maintain scalable, production-grade web applications end-to-end, from feature planning and implementation through deployment and monitoring.
- Manage secure server deployments on AWS and Hostinger, using Secure Shell (SSH/SFTP) for remote configuration, file transfer, and release deployment.
- Drive on-page and technical SEO initiatives — metadata optimization, indexing fixes, and sitemap management — and track organic performance using Google Search Console.
- Build and maintain PHP/MySQL-backed pages on a shared templating architecture, ensuring consistent structure, clean URL routing, and reliable page performance across the site.

SKILLS

Languages: C++, Python, JavaScript, TypeScript

Frontend: React, Next.js, Tailwind CSS, Framer Motion, GSAP, Zustand, Lenis, HTML/CSS

Backend: Node.js, Express.js, REST APIs, JWT, Google OAuth

Databases: MongoDB (indexing, aggregation), MySQL, PostgreSQL, Prisma

Cloud & DevOps: AWS, Hostinger, Secure Shell (SSH/SFTP), Google Search Console, Vercel, Render

Tools: Git, GitHub, Postman, Linux, VS Code, Cursor

AI / ML: Groq API, Gemini API, Multimodal AI Integration, Cloudinary

PROJECTS

MediGuard | AI Counterfeit Medicine Detection Platform [Link](#)

React · Node.js · Express · MongoDB Atlas · Groq Vision · Gemini API · Cloudinary · JWT

- Built an AI-powered platform to detect counterfeit medicines for Aminabad Dawa Bazar, one of Uttar Pradesh's largest wholesale drug markets.
- Engineered CDSCO batch validation and GSTIN-based supply chain verification to authenticate drug legitimacy end-to-end.
- Integrated Groq Vision and Gemini APIs for real-time image analysis of medicine packaging, flagging spoofing and tampering.
- Built a JWT-secured chemist locator with Leaflet maps and B2B wholesale invoice auditing for verified distributors.

Omega | High-Scale Product Pagination System [Link](#)

React 18 · Vite 8 · JavaScript (ESNext) · Tailwind CSS · Express.js · MongoDB

- Built a cursor-based pagination Express.js + MongoDB API handling 200,000+ products with consistent sub-second response times.
- Designed a composite (created_at, _id) MongoDB index to eliminate skip-based query slowdowns at scale.
- Built a React 18 + Vite admin interface on top of the API for browsing and managing product data.
- Deployed the frontend on Vercel and the backend API on Render.

Sahayak | Cooperative Gig Services Marketplace [Link](#)

Next.js · Node.js · Express · PostgreSQL · Prisma · Framer Motion

- Engineered a cooperative-owned gig-services marketplace for Smart India Hackathon 2026 (Problem Statement 26089), connecting Labour Cooperative Federation workers with households.
- Designed custom Prisma schemas over PostgreSQL to model relational data across workers, bookings, and services.
- Built an interactive onboarding flow with Framer Motion animations and integrated Google Authentication for secure sign-in.
- Architected a decoupled deployment (frontend on Vercel, backend on Render) enabling independent scaling of client and API layers.

ACHIEVEMENTS

- Top 20 of 450+ teams — Hack4Good Agentic AI Hackathon, Lucknow
- Top 20 of 400+ teams — GDG Agentic Premier League: Build with AI, Lucknow
- Cleared internal selection round — Smart India Hackathon (SIH)

EDUCATION

University of Lucknow — B.Tech, Computer Science & Engineering

Aug 2024 – Jun 2028

SGPA: 8.2

Jawahar Navodaya Vidyalaya, Etawah — CBSE, Class VI–XII (PCM + Computer Science)

Jul 2017 – Jun 2023
